

Year 1's Homework Menu - Spring 2nd Half Term

English

We have written a story about an alien. Invent your own alien and write some sentences to describe it!

Make sure you use a capital letter and a full stop.

Maths

Take a basket or bag, go outside and collect some items, pebbles, twigs and leaves.

Ask questions such as:

- How many rows of three can you make from your pebbles?
- Did you have any left over?
- Are there enough pebbles for each of us to have five? Show me.

Show me a collection where we would get the same number if we shared the objects between me and you.

I need half of those... Can you give me half?

If we wanted me, you and [another person] to have the same number of pebbles, how many would we have each?

<p style="text-align: center;">Fish</p>  <ul style="list-style-type: none"> Gills Fins Scales 	<p style="text-align: center;">Birds</p>  <ul style="list-style-type: none"> Feathers Lay hard shelled eggs Parental care
<p style="text-align: center;">Amphibians</p>  <ul style="list-style-type: none"> Live on land and water Lay eggs in water Moist skin Adults have lungs 	<p style="text-align: center;">Reptiles</p>  <ul style="list-style-type: none"> Scale-covered skin Lay soft shelled eggs on land Some parental care
<p style="text-align: center;">Mammals</p>  <ul style="list-style-type: none"> Hair Ear pinna Parental care Mammary glands 	

Science

This term, we will be learning all about animal groups. Can you think of an amphibian, reptile, fish, bird and mammal? Draw a picture of one and label parts of it.

Maths

Take a basket or bag outside and collect some items such as pebbles, twigs and leaves.

Help children to count the objects in ones and then in twos. They pick up an object in each hand and place it as a pair in front of them. If the final objects counted make a pair, the number is even. If it is alone, the number is odd.

Once they have counted all of the objects, ask:

- Could you pick up all of the objects in pairs?
- Were there an odd number of ... or an even number?
- How do you know?
- How many groups of two could you make?

RE

Spring term is all about the Easter story. With a grown up, watch videos or read the story together. There are many useful clips on the BBC teach website. Summarise the events the events in the story with pictures, sentences or you might like to act it out.

English

Choose one of your favourite books and retell the story. You could do it with pictures or write the story. You might want to record yourself with puppets and send it via the office. You choose how you want to retell the story!

Personal Development

This half term, we will be learning about staying healthy. Think of something you can do or change that might help you to become healthier. Maybe you could add a ten-minute walk to your day or change a snack. Draw a picture of what you would like to do to stay healthy and label it.

English

Can you write a list of three of your favourite things? Then turn your list into a sentence. Only use the word 'and' once. Tell us why you like these things using because in your sentence!

My favourite things are cats and food.
My favourite colours are pink and turquoise.
I like turquoise because it reminds me of the sea.

Maths

An array is an arrangement of objects into equal rows. This array shows two rows of three ice-lollies

$$3 + 3 = 6.$$

Here are some mystery arrays. Can your child work out what the array is of?

Go on an array hunt around your home and allow your child to take photos of some arrays such as egg boxes, muffin trays, chocolate boxes and tiles in the bathroom. Talk about how many rows there are and how many in each row.
