

## Year 1's Homework Menu - Summer 2<sup>nd</sup> Half Term

### English

Practice letter formation. Make sure all your letters start and end in the correct place. This will help when you start to join your letters!

### Maths

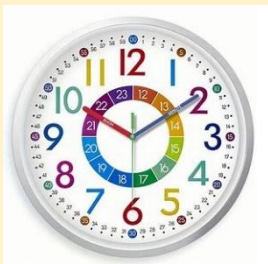

Explore money, go to the shops with some coins and pay for some items yourself!

Try to work out how many coins you will need first and how much change you will get.

### Science

This term our science and topics will link- We will be looking at different types of transport. This will be a way to consolidate our materials learning. Look at vehicles- what materials are they made of? Why do they have glass windshields? Why are the tyres rubber? Why is the door made of metal?

### Maths

Learning to tell the time can be tricky. Start to learn to tell the time. Try to learn using an analogue clock, like the one in the picture.

### RE

We will be looking at the Christian creation story. If you could create something what would it be? Draw and label your creation! It could be an animal, a planet or a person. Use your imagination.

### Topic

Our topic is transport. Could you go on a train or bus journey? Draw or write about your trip.

Or see how many types of vehicles you can spot driving past your home and make a list. Can you list all the different types of transport there are?

### Personal Development

As we approach the end of the year, think back to something you really enjoyed learning or doing. Write or draw about what you liked best.

### English

Write a story, a poem or an information text about anything you like! Have fun and be creative. Just remember to form your letters correctly!

### Maths

What shapes can you find around your home? Can you find flat 2d shapes or 3d shapes? Use the words edges, sides, corners and faces to describe the shapes you find; draw and label them.
